Solutions for Women Femmerol Formulation Listed in the US National Library of Medicine Nutritional Supplement Label Database

ROCKVILLE CENTER, New York, November 4, 2009– Solutions for Women today announced Femmerol, a patented, clinically tested herbal formulation for relieving symptoms of menopause has been listed in the US National Library of Medicine Nutritional Label Database. Femmerol is an innovative liquid formulation introduced in 2006.

“We have met consumer demand for an effective herbal formulation for menopause symptoms” said Sabina Fasano, founder and CEO of Solutions for Women. “In the past, women seeking herbal solutions for relief from menopause-related symptoms had no way of ascertaining the quality herbal products on the shelf. Femmerol sets the bar high, guaranteeing that women receive medicinal-quality herbal extracts with no fillers, preservatives, or allergens, and that each bottle of Femmerol delivers standardized high potency.”

Femmerol is an innovative liquid formulation that also delivers enhanced bioavailability in a vegetarian capsule. Liquid Femmerol was developed in conjunction with Capsugel, the global leader in capsule manufacturing. “Femmerol’s effectiveness is enhanced by micronizing the liquid herbs extracts, which increases particle surface area, and makes it easier for the body to absorb,” said Jeff Taylor, Senior Formulation Scientist for Capsugel. “Capsugel is committed to developing excellence in encapsulated liquid formulations, and we are pleased to provide a key element of a quality product that supports women’s well being.”

Femmerol combines 11 herbs in a patented formulation that has been clinically tested and shown to help relieve 17 primary symptoms associated with peri-menopause, and menopause. All of Femmerol’s eleven herbs are FDA-approved for ingestion. Femmerol is
