Solutions for Women Introduces Liquid Femmerol Formulation

Enhanced Bioavailability in Innovative Vegetarian Capsule

ROCKVILLE CENTER, New York, September 25, 2007– Solutions for Women today announced a liquid formulation of Femmerol, its patented, clinically studied herbal supplement for relieving symptoms of menopause. The new formulation delivers enhanced bioavailability in a vegetarian capsule, while meeting changing consumer preferences for liquid products.

“Femmerol represents a benchmark for herbal products in a confusing marketplace,” said Sabina Fasano, founder and CEO of Solutions for Women. “In the past, women seeking natural solutions for relief from menopause-related symptoms had no way of ascertaining the quality or consistency of herbal products on the shelf. Femmerol sets the bar high, guaranteeing that women receive medicinal-quality herbal extracts with no fillers, preservatives, or allergens, and that each bottle of Femmerol delivers consistent high potency.”

Liquid Femmerol was developed in conjunction with Capsugel, the global leader in capsule manufacturing. Femmerol’s patented herbal formula is suspended in a natural Omega-9 fatty acid oil matrix for an anti-oxidant benefit. The liquid is filled into capsules which are vegetarian and kosher to meet customers’ dietary preferences.

“Femmerol’s effectiveness is enhanced by micronizing the herbs, which increases particle surface area, and makes it easier for the body to absorb,” said Jeff Taylor, Senior Formulation Scientist for Capsugel. “Capsugel is committed to developing excellence in

encapsulated liquid formulations, and we are pleased to provide a key element of a quality product that supports women's well being."

"Femmerol has made a significant difference in addressing my menopause symptoms," said Rosemarie Cartagine, D.C. "I immediately noticed a difference with the liquid formulation, which has helped keep me symptom-free, calm, and with no stomach upset."

Femmerol combines 11 herbs in a patented formulation that has been clinically studied to help relieve 17 primary symptoms associated with PMS, peri-menopause, and menopause. All of Femmerol's eleven herbs are FDA-approved for ingestion. Femmerol is available immediately information from the company's Web site, www.solutionsforwomen.com.

About Solutions for Women

Solutions for Women was founded in 1992 to develop natural solutions for menopause and peri-menopause symptom relief. Its flagship product, Femmerol, is a patented, clinically tested product for relieving the primary symptoms associated with hormone imbalance. The company is privately held and based in Rockville Center, New York.
